FILE HEADING

Sinking of tube-wells in the Shimoga Town

From

The Sanitary Commissioner

No 1880 Dated 25-10-09 Received 30-10-09

Diary No 2923 | Enclos | Spare Copies | Serial No 18

BRIEF ABSTRACT OF LETTER

States with reference to the result of sinking a tube-well near Durgigudi in Shimoga Town, that Norton's or Abyssinia tube well is no good where rocks have to be met with and that either the English drill (preferably diamond drill) or the Japanese method is necessary to pierce rock

NOTES AND ORDERS

Flag P

The Ch Engr states on the other hand that although attachments for boring through rock are easy & procurable the process of boring in rock is expensive and that as there is very little, if any, likelihood at all of finding water-bearing strata below the rock there the trials might be abandoned

Sir,

Cop O

With reference to your No. 10610-1 Mi.105-08-14 dated the 26th April 0^ forwarding for my remarks copy of letter No. 247 of 31-3-09 from the Municipal President, Shimoga Dist reporting the result of sinking a tube well near Durgigudi in Shimoga town, I have the honor to state that these tube wells presumably Norton's or the Abyssinian tube well- is no good where rock have to be dealt with. Either the English drill (preferably diamond drill) or the Japanese method is necessary to pierce rock.

I have the horor to be,

Sir,

Your most obedient servant,

M.D.,
Lt.Co..I.M.S.,
Sanitary Commissioner

worthwhile to proceed with
mechanical well boring in this particular locality, as although
facilities for boring through
rock are easily procurable, the process
of boring in rock is expensive and
that as there is very little, if any,
likelihood of finding water-bearing
strata below the rock there, the
trials might be abandoned.
(3) Letter No. 1880/26-10-09 from
the Secy. Comm[r] with the Govt. of
Mys. the Maharaja of Mysore, stating
that the above tube well, presumably
on Norton's or the Abyssinian tube
well is no good where rocks have
to be dealt with and that either
the English Drill, preferably the
diamond drill, or the Japanese
method is necessary to pierce rock.
